OBJECTIVE

This DDOT project will address the local recurring flooding problem near the Cleveland Park Metro Station and will improve and implement the following:

- Improve drainage along the project corridor
- Modify drainage structures
- Improve vehicular and pedestrian safety, access and visibility
- Install necessary street furnishings, crosswalk striping
- Improve streetscapes along the Connecticut Avenue corridor
- Install native trees, permeable pavers and tree boxes
- Install curb extensions, bicycle racks and trash cans
- Upgrade curb ramps to meet ADA standards
